

ENVIRONMENTAL AND ENERGY POLICY

Given the **environmental and energy challenges** faced by every human and business activity and especially the **automotive industry** and true to our **core philosophy** which is the **driving force** that defines **our history and future**, at AIGLON SA we operate in a responsible way **to protect the environment** and we **act with welfare and the common good in mind** in all aspects of our business activity.

In this context and following a **structured approach**, we have recognized **our responsibilities and obligations** towards the environment and the relevant **requirements and expectations** of stakeholders, we have identified our **environmental aspects** and we have developed **procedures, practices and programs** that allow us to commit:

- to the **conscious and unwavering** implementation of our **environmental and energy operating commitments** and **compliance** with the requirements of the applicable legislation,
- to **limit the environmental impact** of our activities,
- to the **continuous improvement** of our environmental and energy performance,
- to **minimize our energy costs** and **limit harmful greenhouse gas emissions**.

We focus:

- on **reducing the impact on climate change**:
 - through the promotion of **low-emission vehicles (LEV)** and the availability of **highly efficient and technologically advanced vehicles**, with low fuel consumption,
 - by minimizing direct **energy consumption**, increasing **our energy efficiency** and **saving energy and natural resources throughout the life cycle of our services**,
 - by implementing **practices and technologies** that reduce pollution and improve our energy performance,
- on **recycling and rational waste management**,
- on the **supply** of high energy efficiency **products and services**,
- on the **environmental and energy awareness and training** of our staff, the Network of Official Distributors and Authorized Repairers, our suppliers and partners and on informing our customers and interested parties,
- on **securing and providing the necessary** resources and information for the continuous improvement of the Environmental and Energy Management System and for the achievement of the environmental and energy goals.

THE MANAGING DIRECTOR
